

Bishoujo Senshi Sailor Moon Pantyshot Guide

This guide covers pantyshots of 11 Sailor senshi (Inner, Outer, Chibiusa, Chibi Chibi) appearing "Bishoujo Senshi Sailor Moon" anime series.

Pantyshots were screencapped by scenes. If pantyshot appeared in one frame, or in several frames without motion, it was recorded as one picture; if it appeared in several frames with motion, revealing different areas of panties, it was recorded as a series of captioned frames (to the maximum of six frames), combined side by side to show the animation. If pantyshot animation sequence was interrupted by camera showing a different scene, and then returning to the same character and showing the pantyshot again, it was treated as one pantyshot instance if camera returned to the same frame and the character didn't change the pose (e.g., pantyshot instance 023b interrupted by camera showing Nephrite, but then returning to Usagi still sitting in the same pose); if after the interruption character changed pose, or camera showed them from a different angle (distance), it was treated as separate pantyshot instance (e.g., instances 023a and 023b – in the first one Usagi is flying after being attacked by Nephrite, and in another she is sitting on the ground and camera giving a closer view).

All pantyshots are enumerated according to episodes (movies) they originate from. If there was more than one pantyshot per episode, they were enumerated by adding a letter to the end (A, B, C, etc.). Also, all pantyshots are marked by a letter in parenthesis to denote the kind of pantyshot: (f) – sailor fuku; (s) – sportswear (episode 039 only); (t) – true panties (as opposed to sailor fuku and sportswear).

Special episodes (SuperS special (3 episodes combined), Ami-chan no hatsu koi, Make Up Sailor Senshi) don't have any pantyshots, and thus were not taken into account for calculating statistics.

Comments on separate screenshots

010. Usagi (t) – this pantyshot appeared only in preview in episode 009, and was censored by black shadow in the actual episode.

011b. Rei (f), 015. Rei (f) – the same animation sequence used in two episodes.

052a. Minako (t) – questionable, as Minako doesn't have a skirt. Traditionally "pantyshot" is an upskirt view of girls's panties.

065d. Mako (f), 068e. Mako (f) – the same animation sequence used in two episodes.

072b. Usagi (f) – pantyshot with longest onscreen time in the series. The camera returns to the same scene five times, showing in total, approximately, 21 seconds of the same pantyshot sequence. This pantyshot cannot be seen in the ADV DVD release due to cropped screen borders.

171c. Rei (f) – questionable, as the line is too low to be fuku; could be wrongly colored shadow.

R Movie C. Usagi (f) – this pantyshot can be seen only in Pioneer/Geneon USA DVD releases. All other DVD and VHS releases of the movie switched to 16:9 format instead of 4:3, thus cropping top and bottom parts of the screen. R Movie A, SuperS Movie B, and SuperS Movie C pantyshot instances on Pioneer/Geneon USA DVD releases have more frames due to the same reason.

add-078, add-130 – were meant to be pantyshots, but the panties parts were colored with the same color as bodies; thus counted as coloring errors. The same is true for add-059, but panties are wrongly colored with the same colors as the senshi's skirts.
